(57) Abstract :

ABSTRACT DIGITAL CASE MANAGEMENT AND HEARING FACILITATION SYSTEM The present invention relates to a Digital Case Management and Hearing Facilitation System (100) for judicial proceedings, designed to streamline case filing, tracking, and hearing management through a web-based platform. The system (100) comprises a user registration and authentication module (101) for secure login and role-based access, a case filing module (102) enabling litigants and lawyers to submit cases and supporting documents, and a case assignment engine (103) for automated allocation of cases to judges based on jurisdiction and availability. The role-based access control module (104) provides tailored dashboards for judges, lawyers, litigants, and administrators, while the case tracking and update module (105) delivers real-time notifications on case status, hearing schedules, and verdicts.
